

IRRIGATION DESIGNER

Boland Irrigation is a growing irrigation design and implementation company based in the Western Cape, specialising in agricultural irrigation systems including drip, micro, sprinkler, and bulk water reticulation.

We are seeking a motivated *Irrigation Designer* with a hands-on approach to join our team. The position is available from **1 March 2026**.

The office is based in **Brackenfell** and the successful incumbent will be required to travel when servicing clients.

Key Performance Areas:

- Surveying and mapping out irrigation systems
- Design of practical irrigation layouts and hydraulic systems according to clients' specific needs
- Compilation of Bills of Quantities (BOQs) and preparation of quotes
- Preparation of design drawings
- Overseeing installations (project management) providing guidance and on-site technical support
- Providing thorough maintenance support and effective fault finding to clients
- Collaboration with installation teams and clients

Requirements:

- Matric minimum
- Relevant tertiary qualification in Civil, Mechanical or Electrical Engineering will be advantageous
- 3-5 years' experience in irrigation design (or similar technical design fields)
- Previous experience with AutoCAD and Model Maker (or similar design programs) will be beneficial
- Well-developed interpersonal skills and ability to build and maintain strong relationships with role players
- Proficient in English and Afrikaans
- Practical mindset, strong problem-solving skills, and willingness to work hands-on
- Willingness work both on-site and in-office
- Valid driver's licence

The company offers market related remuneration and benefits, based on the successful applicant's experience and qualifications.
